TIMIEBI NICHOLAS KOSU

SENIOR FRONTEND ENGINEER

Professional Summary

Frontend Engineer with over 5 years of experience designing, architecting, and delivering scalable web and mobile applications. Strong expertise in React, Next.js, TypeScript, and React Native, with a focus on performance, security, component architecture, and user experience. Experienced across fintech, emergency infrastructure, agricultural e-commerce, and bespoke client software, with end-to-end ownership from frontend architecture and API integration through production delivery.

Employment History

JUN, 2021 -- PRESENT

Senior Frontend Engineer, Chainconsult, Remote

- Lead end-to-end frontend delivery for production platforms including Remitally, MyRentEase, and UsePilot, architecting scalable component systems in Next.js and TypeScript.
- Improved application performance by 35% through TanStack Query, code splitting, memoization, and asset lazy-loading strategies.
- Integrated complex REST API layers and designed resilient client-side data architectures with error-boundary isolation and graceful degradation patterns.
- Defined and enforced frontend security practices including secure token storage, XSS/CSRF prevention, and input sanitization across financial data flows.

APR, 2025 -- MAY, 2026

Frontend Infrastructure Lead, Mama, Lagos, Nigeria

- Directed frontend component engineering for an agricultural e-commerce marketplace delivering fresh farm products across Lagos.
- Engineered a specialized mobile-first web experience optimized for low-latency asset delivery across constrained Nigerian networks.
- Tightened checkout rendering paths, reducing Time to Interactive and eliminating Cumulative Layout Shifts across the critical purchase journey.

MAR, 2025 -- FEB, 2026

Lead Software Developer, Social Villagers Development Initiative, Lagos, Nigeria

- Architected and built the organization's web platform on Next.js, implementing automated form submission pipelines and transactional email infrastructure through the Resend API.
- Delivered Google Apps Script automation for member onboarding workflows, supporting campus network expansion and volunteer coordination across universities in Nigeria.

MAY, 2025

Lead Frontend Engineer, Tidiviews, Portugal / Remote

- Architected and owned the interface layer for a coastal monitoring platform delivering real-time oceanographic and wave data.
- Built performant map tracking feeds in React Native (Expo) and Next.js, integrating live WebSockets to manage continuous environmental stream data.
- Implemented adaptive rendering strategies to maintain smooth UI performance under high-frequency sensor data streams.

FEB, 2024 -- JAN, 2025

Software Engineer, Trigger App, Remote

- Shipped core SaaS UI features end-to-end, establishing maintainable design-system components across a real-time emergency automation platform built in React and TypeScript.

2023 -- 2024

Lead Software Developer, Dekstaq, Lagos, Nigeria

- Led development of Dekstaq's company website and bespoke software solutions for business clients, delivering production-ready web applications across multiple client engagements.
- Owned application development from requirements and interface implementation through integration,

testing, and delivery, translating business needs into maintainable software.

- Built responsive, user-focused web experiences while establishing reusable frontend patterns to support consistent delivery across projects.
- Provided technical direction to a small group of developers during project delivery, reviewing implementation work and coordinating development activities.

Projects

Bamboo Terminal --- Fintech Investment Infrastructure

Contributed to web application infrastructure supporting institutional stock trading suites, real-time financial data feeds, and transaction monitoring.

SiteFlow --- Project Management Platform

Built a project management platform for organizing workspaces, teams, projects, tasks, timelines, files, communication, notifications, members, and role-based access.

Gesi --- African Heritage & Tourism Platform

Built an African heritage and tourism platform connecting cultural stories, destinations, tourism experiences, and heritage content through a modern web experience.

Tidiviews Mobile Engine --- Coastal Intelligence Platform

Built mobile and web interfaces for real-time coastal monitoring, including map-based tracking, environmental data streams, and visual monitoring feeds.

Mama Mobile Marketplace --- Agricultural E-commerce

Engineered mobile-first storefront and checkout experiences optimized for low-bandwidth Nigerian mobile users and rapid purchase flows.

Trigger App Safety Infrastructure --- Emergency SaaS

Built emergency broadcast interfaces supporting live map coordinate streaming and real-time audio log recording across a community safety platform.

Education

2012 -- 2016

Bachelor of Science (B.Sc.) --- Physics, Niger Delta University Wilberforce Island

2021

Software Development Certification, freeCodeCamp
